## NEBOSH National Certificate in Construction Health and Safety

### About this course

The Building Safety Group are an accredited and leading training provider of the NEBOSH National Certificate in Construction Health and Safety qualification.

Due to the specific nature of the course, not only will general health and safety issues be covered, but there will be more emphasis placed on specific construction issues that make the industry amongst the most dangerous in which to work.

### Who is it for?

Supervisors, managers and those with duties placed on them by the Construction Design Management Regulations (Principal Designers and Contractors) within the construction industry who are required to ensure that activities under their control are undertaken safely. The qualification is also appropriate for managers and supervisors working in other industries such as utilities, and even broadcasting, where temporary workplaces are a feature of their activities.

## Why choose this course?

Many larger construction organisations choose the NEBOSH National Construction Certificate, as a key part of their supervisory or management development programme. By ensuring that line managers have a sound understanding of the principles of risk management they build an effective safety culture in the company. Owners or managers of smaller consultancy companies will find this qualification helps them to meet the requirements of clients and principal contractors when working on other people's premises or sites.

## Who is it for?

Unit NGC1, Unit NCC1 and Unit NCC2 consisting of 18 elements are delivered over 16 days including the practical assessment and examinations. A programme of study includes 106 taught hours and 58 hours of private study. We take this time to ensure a fantastic pass success rate – in fact, many students gain credits and distinctions.

## Why choose this course?

At the end of the course there are two, two-hour written examinations and a practical assessment.

- Unit NGC1: Management of health and safety is a taught unit, assessed by one two-hour written examination.
- Unit NCC1: Managing and controlling hazards in construction activities is a taught unit, assessed by one two-hour written examination.
- Unit NCC2: Construction health and safety practical application is assessed by practical assessment of a construction site, or part of a site, and preparing a management report.
